### SKILLS

#### Front-end Development:

HTML, CSS, JavaScript (7+ years), React (3 years), TypeScript (3 year), Redux, Redux Toolkit, Redux Saga, MobX, React Hooks, React Hook Form, Next.js, XML, HTML5, SASS, SCSS, CamelCase, BEM.

#### JavaScript Tools & Libraries:

Promise, Async/await, JSON, ES6+, Fetch, Axios, Jest, StoryBook

#### UI Libraries and Frameworks:

MUI (Material-UI), MaterializeCSS, Bootstrap, Foundation, Chakra UI, Ant Design.

#### Content Management Systems & E-commerce:

Bitrix, Bitrix API, WordPress, OpenCart, Joomla.

#### Developer Tools & Deployment:

GooglePageSpeed Tools, Chrome/React/Redux DevTools, Remmina, FileZilla, Bash, Photoshop, Figma, Gimp, Git, GitHub, ESLint, Stylelint, Prettier, GPT-3, Vercel, Webpack, npm, yarn.

### EDUCATION

Master's Degree in Civil Engineering

### CERTIFICATES

Meta Front-End Developer

### LANGUAGES

English — Intermediate

Ukrainian — Native

Russian — Fluent

### PROFILE

Experienced Frontend Engineer specializing in web development and e-commerce solutions. With a proven track record of delivering high-quality projects, I possess deep knowledge in frontend development. In recent years, I have focused on advancing my expertise in React (React, Next.js, TypeScript, Redux). I am particularly interested in application architecture, scalability, and modularity. I am well-versed in popular technologies and UI libraries.

### WORK EXPERIENCE

#### Front-End Engineer

##### GetWin

06/2023 - 01/2024

Led the migration from Create React App (CRA) to Custom React App Configuration Override (CRACO). Successfully migrated the project from Node.js v14 to v20. Updated and replaced deprecated libraries, transitioning from Ant Design v4 to v5. Configured ESLint, Prettier, and Stylelint for enhanced code quality and consistent styling. Spearheaded a shift from traditional Redux to Redux Toolkit, improving efficiency. Developed custom UI components with Ant Design and enhanced existing codebase for better quality and functionality. Implemented React Hook Form with Yup validation and integrated input masks for better user experience. Enabled real-time communication by integrating WebSocket functionality. Managed frontend integration, API calls, and data retrieval functions using Redux Saga and Redux Toolkit.

##### Divi Den Ltd / MaxiBlocks

08/2022 - 11/2022

Teamwork on a large plugin powered by WordPress Gutenberg Block. Development of the dynamic content module. Debugging, code refactoring. Correction of various errors and bugs in modules, improvement of functionality. Unit tests.

##### Self-Employed

2021- ...

In my work on various projects, I developed interfaces using Next.js 14, React, and TypeScript, while managing state with Redux and Redux Toolkit. I implemented internationalization with i18next and next-intl, customized themes using Chakra UI, MUI, and MaterializeCSS, and developed server-side APIs in Next.js. I also built complex forms with validation and input masks, and configured ESLint and Prettier to ensure code quality. My work emphasized modularity, breaking down projects into business logic and UI components for better maintainability.

#### Full Stack Engineer

##### Step2Use / Atlant / Self-Employed

2013 - 2021

Over the course of 8 years, my responsibilities included developing web pages and e-commerce stores of varying complexity using PHP and JavaScript, with a strong focus on front-end development. I've gained deep expertise in e-commerce business logic and have actively engaged in client interactions, proposing and selecting solutions. Additionally, I've led a small team, managed full project lifecycle support, and ensured the creation of adaptive, cross-browser interfaces. My work also involved continuous project support and integration with various libraries, metrics, and APIs.
